This Addendum consists of:

Project bid period date adjustments.

Acknowledge receipt of this Addendum in the space provided on the Proposal/Bid form.

Question 1:

The bid items on page 19 are referred to as "Deductive" in a few areas on this page. Please clarify if these are bid items deductive or additive.

Answer 1:

Alternative 1 is a deductive alternative. See attached revised BID FORM - 00 41 43.

Question 2:

Sheet C1/C2 & Sheet C5 show different locations for installation of the Inlet Water Pipe. Can you please confirm correct location?

Answer 2:

See attached Revised Sheet C5.

Question 3:

Sheet C5 shows an additional 6" Gate Valve just outside of the tank on the inlet pipe. It also appears that all pipe going under the tank will need to be ductile iron. Will the district require this pipe to be flanged under the tank or is push on joints acceptable?

Answer 3:

The gate valve is also shown on Sheet C2. It is just in a different location and lacks a call out. A revised Sheet C5 shows the valve in the correct location.

Per Section 33-16-23, Page 2, Part 1, 2.9, "Pipe and fittings for fluid conductors connected to the tank shall be steel pipe as shown on the drawings and conforming to ASTM A53 grade B".

For clarification, most pipe under the tank is expected to be welded steel pipe without flanges or fittings as provided by the tank manufacturer. For longer sections such as may be required for the inlet pipe, a flanged joint would be acceptable under the tank.

Question 4:

Can you provide a detail for what you are looking for when you call out for a 6" High Removable Silt Stop on the tank connection to the outlet pipe.

Answer 4:

See attached suggested detail for Silt Stop

Question 5:

Can you tell us what the Engineer's estimate is for construction?

Answer 5:

A formal engineer estimate has not been released for this project. Based on prior bid projects for other special districts, the engineer estimates this project to be between 700k-900k.

Question 6:

Do you have a plan holders list for this project?

Answer 6:

See attached plan holders list.

Question 7:

What are the liquidated damages on this project?

Answer 7:

See Section 00 73 13 – SPECIAL CONDITIONS, 1.8 Liquidated Damages Due to Contractor Delay.

Question 8:

Is there a detail for the French drain?

Answer 8:

Contractor's attention is directed to note on the perforated pipe underdrain on Detail 2/C4 which provides specifics on the installation of the drain.

Question 9:

Are there any requirements for the California Fire Code Hot Work Permit?

Answer 9:

Contractor shall be responsible for obtaining the appropriate permit through the local fire authority for Hot Work within a Wildfire Risk Area. District will allow the use of water for fire prevention activities through the existing raw water supply pipeline. A convenient location to access water could be through the irrigation stub that will be constructed on the tank inlet pipe as shown on Detail 11/D1. The supply line currently supplies up to 100 gpm to the cemetery, but little pressure exists at this location. Contractor shall be responsible for providing equipment necessary for pressurization of water for use in fire prevention measures. All cost associated with this portion of work shall be included in the contract base bid price and no further compensation will be provided.

Question 10:

Are there any tree protection requirements?

Answer 10:

See attached Tree Protection Detail

Question 11:

What are the requirements for culvert protection for the bid alternate sheet?

Answer 11:

Contractor shall protect in-place existing culvert by maintaining steel plates over the culvert crossing. The contractor shall replace the culvert new, like-kind size and material if damaged. The contractor can replace the culvert completely in like-kind size and materials if they choose to not cover it with steel plates. All costs associated with this portion of work shall be included in the contract base bid price and no further compensation will be provided.

END OF ADDENDUM

Upon receipt of the signed contract and other required documents, the contract will be executed by the District, after which the District will prepare a letter giving Contractor Notice to Proceed. The official starting date shall be the date of the Notice to Proceed, unless otherwise specified. The undersigned agrees to begin the Work within ten (10) working days of the date of the Notice to Proceed, unless otherwise specified.

The undersigned has examined the location of the proposed work and is familiar with the Drawings and Specifications and the local conditions at the place where work is to be done.

If awarded the contract, the undersigned agrees that there shall be paid by the undersigned and by all subcontractors to all laborers, workers and mechanics employed in the execution of such contract no less than the prevailing wage rate within Placer County for each craft, classification, or type of worker needed to complete the Work contemplated by this contract as established by the Director of the Department of Industrial Relations. A copy of the prevailing rate of per diem wages are on file at the District's Administration Office and shall be made available to interested parties upon request.

Enclosed find cash, bidder's bond, or cashier's or certified check No. N/A from the Old Republic Insurance Company Bank in the amount of 10% of total bid price, which is not less than ten percent (10%) of this bid, payable to Newcastle Rocklin Gold Hill Cemetery District as bid security and which is given as a guarantee that the undersigned will enter into a contract and provide the necessary bonds and certificates of insurance if awarded the Work.

The bidder furthermore agrees that in case of bidder's default in executing said contract and furnishing required bonds and certificates of insurance, the cash, bidder's bond, or cashier's or certified check accompanying this proposal and the money payable thereon shall become and shall remain the property of the Newcastle Rocklin Gold Hill Public Cemetery District.
